

বিদ্যুৎ উৎপাদনের অনেক বিকল্প আছে
সুন্দরবনের কোনো বিকল্প নাই

সুন্দরবন রক্ষাসহ জাতীয় কমিটির ৭ দফা দাবিতে
ঢাকা থেকে সুন্দরবন অভিযুখে

লংমার্চ

২৪-২৮ সেপ্টেম্বর ২০১৩

কেন রামপাল কয়লাভিত্তিক বিদ্যুৎ প্রকল্প
সুন্দরবন ধ্বংসী, জাতীয় স্বার্থবিরোধী?
কেন এই প্রকল্প অবিলম্বে বাতিল করতে হবে?
কীভাবে বিদ্যুৎ সংকটের সমাধান সম্ভব?

RAMPAL

জাতীয় কমিটির আহ্বায়ক প্রকৌশলী শেখ মুহাম্মদ শহীদুল্লাহ কর্তৃক
১৩৭/বি এন রোড, আহানারা গার্ডেন ঢাকা থেকে প্রকাশিত ও প্রচারিত।
ফোন: ৮১৪১৯৫২ | www.nebd.org।
দাম: ০০ টাকা। ২৫ আগস্ট, ২০১৩।

ডেল-গ্যাস-খনিজসম্পদ ও বিদ্যুৎ-বন্দর রক্ষা জাতীয় কমিটি

BAvBG wi`tcvtU`Abmvtı :

The concentration of SO₂ in the ambient air near Sundarbans region is found 8 to 10 μg/m³ (field monitoring data, see Table 6.5). Hence, it is found that the resultant concentration (24 hr average after emission contribution and only during November to February) from the power plant) of SO₂ in the ambient air may be maximum 53.4 μg/m³ (see Table 8.3c) which is much below the MOEF's standard (ECR 1997), 80 μg/m³ for **residential and rural area**. Therefore, the concentration of emitted SO₂ is very insignificant to have any impact on Air quality of Sundarbans. (m`f`ivgcjv BAvBG, cŵv-278)
